

BIOGEOGRAPHY

Caribbean coral reefs: ecological history and biogeography **10**

The long view	12
Human influences on Caribbean reefs over 2000 years	13
Shifting baselines	14
Catastrophic loss of keystone species	15
Current state of reefs	16
Mesophotic coral reefs	17
Geographic and depth variability in current reef health	18

Brief 1	22
Factoring marine environments into resource management	

RESILIENCE

Coral reef state and resilience **24**

Coral reef state	26
Drivers of change in coral life cycle processes	28
Phase shifts and reef resilience	29
Loss of reef resilience in the Caribbean	32

Brief 1	34
Preventing blooms of cyanobacterial mats	

Brief 2	36
Reducing nutrients to restore the coral-algal balance	

Brief 3	38
Seagrass meadows as bioindicators of increases in nutrient levels	

Brief 4	40
Influences of seasonality and herbivores on macroalgal growth	

Brief 5	42
Thinking in 3D: integrating habitat complexity into reef management	

Brief 6	44
Conservation of parrotfishes to aid reef recovery	

Brief 7	46
Bioerosion on coral reefs and monitoring its effects	

Brief 8	48
The use of sexual coral reproduction in reef restoration	

CLIMATE CHANGE

Climate change and its effects on Caribbean coral reefs **52**

Global climate change	54
Climate change effects on corals	55
Climate change impacts on Caribbean reefs	56

Brief 1	60
Managing for climate change: incorporating bleaching vulnerability into MPA planning	

Brief 2	62
Buying time for coral reefs by reducing local threats	

FISHERIES	Coral reef fisheries management	64
	Caribbean reef fisheries from past to present	66
	Reef fishery species	68
	Reef fishing gear	69
	Differences and similarities in Caribbean reef-fisheries	70
	Ecosystem-based management of coral reef fisheries	72
	Ecosystem-based management actions	75
	Brief 1 Fishing down the food web: ecosystem effects of fishing	78
	Brief 2 Building a sustainable yellowtail snapper fishery on Caribbean coral reefs	80
	Brief 3 Identifying fishing grounds across small spatial scales: a low-cost fisheries management tool	82
	Brief 4 Average parrotfish weight as a simple but useful indicator of fishing pressure	84
	Brief 5 Understanding and managing invasive lionfish	86
	Brief 6 Managing parrotfish harvesting with habitat protection zones	88
	Brief 7 Using vessel monitoring system data for sustainable management of reef resources	90
	Brief 8 Using connectivity for the transboundary management of reef species	92

SERVICES	Ecosystem services and their value	94
	Ecosystem services	96
	Values and methods	97
	Coral reef ecosystem services and values	98
	Valuation techniques	100
	Management uses of valuation studies	102
	The value of nature in bonaire	105
	Brief 1 Economic value of reef fishes to the dive tourism industry: the implications of reef fish decline	108
	Brief 2 Potential economic impact of reef fish decline on Caribbean reef fisheries	110

GOVERNANCE

Governance	112
Geopolitics in the Wider Caribbean Region	114
The large marine ecosystem (LME) governance framework	115
 Brief 1	118
Governance framework to support reef management	
 Brief 2	120
An introduction to social network analysis for coral reef governance	
 Brief 3	122
Information brokers in reef governance	
 Brief 4	124
Assessing the proximate and ultimate drivers of reef health	
 Brief 5	126
Identifying and addressing governance constraints to reef management	
 Brief 6	128
Exploring community futures for reef governance	

LIVELIHOODS

Livelihoods	132
Understanding livelihoods	134
Caribbean livelihoods framework	135
 Brief 1	140
Coral reef dependency and change: implications for the future	
 Brief 2	142
Livelihood enhancement and diversification to support adaption to changes in coral reefs	

MONITORING

Reef monitoring for management	144
Why monitor reefs?	146
Methods for surveying coral reefs	147
Key points to note when designing a monitoring programme	148
Common reef and lagoon habitats	149
Tips for survey methods:	
Benthos	150
Reef fish	152
Shellfish	153
Interpreting reef monitoring data:	
Fish / Shellfish	154
Coral	156
Other benthic	157
Algae	158
